

on spot

## Rarely has work been so little work.

The best ideas generally arise where people come together and feel comfortable. With Sedus *on spot* you can create the right atmosphere for this purpose: its inviting and cosy design combines the relaxed character of a lounge with productive seating ergonomics. It is a concept that promotes a culture of dialogue – because the time where people did all their work at desks is long since past. Team and co-working areas and places of retreat are also becoming increasingly important – and these are the central zones for which *on spot* has been developed.

**Welcome home  
at the office.**

Concentration or creativity? Efficient or relaxed working? With *on spot* you no longer have to decide one way or the other – it offers both. You like to decide? Gladly: you have a choice of many different versions that can all be individually configured.

**Frame colours**

**The flexible one**

**The all-rounder**

*on spot* four-leg

**The classic**

*on spot* swivel chair

**The homely one**

*on spot* four-leg in wood

No matter which *on spot* you go for: the homely design not only looks good, it does you good too. The shell that flows around the body, the comfortable armrest wings and the lumbar curve provide ergonomics you can feel. The result: a comfortable seating position perfectly balanced between an active and a relaxed posture.

**Personal.** Five shell colours, four frame versions, metal or wood, puristic or upholstered – *on spot* not only combines work and

well-being, but also allows a personal touch.

# Sustainability down to the last detail.

Sustainability and quality “Made in Germany” have been key company principles at Sedus for more than 50 years. Principles that *on spot* also perfectly embodies – with its long product life alone. It also features a recycling-friendly product design and resource-saving production. Naturally preference is given to recycled materials in

manufacturing – for example, the *on spot* shell has a recycled plastic content of around 40%. Another plus in production: the ultramodern, particularly environmentally friendly electroplating facility, where all metal-containing production residues are fully recycled.

You will find more information at [www.sedus.com/en/ecology](http://www.sedus.com/en/ecology)

**Environmentally friendly shine.**  
At Sedus, perfect chrome finishes also mean a treatment plant that removes production residues from the water.

**Upholstery that lasts longer.** Quality that is not only durable but also exemplary in terms of tear and chemical resistance.

**Powder coating instead of painting.** A high quality finish, optimum rust protection and good for the environment too.

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.
