

CHAIR BALTIC

- Company history starts in the year 2000, when one small group of people, who are in love with plywood furniture, decided to establish BFDF – Baltic Furniture Design Factory – company, which creates design in Baltic states.
- We still remain the only one in this area, who creates design for local market.
- We cooperate with Komplot design, Circus Design, Jakob Berg, Jacob Wagner, Sven Ivar Dysthe.
- We have received several awards: Flow, Python, Chat chairs won a competition as “The Best Design Furniture in Latvia”. Python chair by Komplot Design has won the “The Best Export Product of Latvia” in Year 2004.
- In October 2006 the new name was presented to the public. This name is the child of BFDF and Mollerup Designlab, who created the new brand. The word Baltic is still in the name of the company, because we are proud, that we come from these area.
- Our USP’s are:
 - Technically complicated products
 - Scandinavian design
 - Every chair has its own unrepeatable feature and its functional purpose
 - Chair Baltic - outstanding seating
